

# CLINICAL TRANSFUSION PRACTICE

Free elearning courses for healthcare professionals who administer and/or prescribe transfusion.

## Aims

These courses will help you to appropriately prescribe, administer and monitor the transfusion of blood and blood products.

## Assessment & CPD

Includes online assessment, and a certificate for continuing professional development (CPD) points.

## Content

Course content is based on the national *Patient Blood Management Guidelines* and guidelines developed by the Australian and New Zealand Society of Blood Transfusion, and developed by a multi-disciplinary group of expert clinicians.

## Clinical Transfusion Practice

This course includes the risks, benefits and prescription of blood, patient consent, collection of pre-transfusion samples, picking up blood from a transfusion laboratory or blood fridge, administering blood, monitoring the patient and managing acute transfusion reactions.

## Clinical Transfusion Practice: Refresher

This course is for those healthcare professionals who have previously completed the Clinical Transfusion Practice course and wish to refresh their knowledge. It is based on five short case studies and covers the key principles of transfusion practice.
