

CRITICAL CARE

Free elearning course for healthcare professionals – primarily doctors and nurses – caring for critically ill patients.

Aims

This course will help you identify and apply the principles of blood management to a critically ill patient and includes: management of anaemia; managing the risk of bleeding and coagulopathy; optimising haematological deficiencies; and appropriate transfusion practice.

Assessment & CPD

Includes online assessment and a certificate for continuing professional development (CPD) points.

Content

Course content is based on current evidence and the national *Patient Blood Management Guidelines: Module 4 Critical Care*.

This course has been developed by a multi-disciplinary group of expert clinicians.

It is presented as a clinical scenario where learners need to choose the appropriate management to provide the best patient outcomes.
