

INTRAOPERATIVE CELL SALVAGE

Free elearning course for healthcare professionals who use intraoperative cell salvage.

Aims

This course provides an introduction to intraoperative cell salvage. It covers the benefits of cell salvage in different patient groups, how it contributes to effective patient blood management, an overview of how cell salvage is performed, and important clinical information and considerations when setting up a cell salvage service in your organisation.

Assessment & CPD

Includes online assessment, and a certificate for continuing professional development (CPD) points.

Content

Course content is based on current clinical guidelines, evidence-based material and/or expert consensus opinion, and has been developed in collaboration with leading cell salvage experts in Australia.

All staff that use autotransfusion devices will require on-site training and assessment by an experienced and appropriate operator, where necessary in conjunction with education and training from the company supplying the device.
