

# PERIOPERATIVE

**Free elearning course for medical practitioners, nurses, midwives, laboratory staff and healthcare professionals caring for perioperative patients.**

## Aims

This course will educate healthcare professionals involved in the management of surgical patients on Patient Blood Management (PBM) practices and how to develop and implement patient blood management as the standard of care within their clinical setting.

## Assessment & CPD

Includes online assessment, and a certificate for continuing professional development (CPD) points.

## Content

Course content is based on the national *Patient Blood Management Guidelines: Module Two Perioperative* and current evidence.

This course was developed with the clinical input and expertise of a multi-disciplinary group of expert clinicians.

It outlines the management of patients in a preoperative, intraoperative, and postoperative setting, and includes the importance of patient communication.
